

Event Center Survey

Public Input for the Gregg County Event Center

A new multi-purpose event center could be constructed in Gregg County. The County commissioners are discussing the facility, which would be located in the Maude Cobb Convention & Activity Complex and built using Gregg County reserve funds. After construction is complete, the City of Longview will operate and maintain the facility.

Features of the event center include:

- Building size of approximately 100,000 square feet
- A performance area of 150 feet x 300 feet
- Seating for approximately 4,500 people
- Concession stands
- Optional VIP boxes that are fully enclosed
- Sides of the facility are open to the outside
- Temperature control using large HVLS circulating fans

Options for future improvement include enclosing the entire event center and installing air conditioning as well as the enlargement of the concession areas to accommodate full service food preparation equipment.
